Sources:

- 1) Potentially eligible: SHADAC analysis of the 2013 American Community Survey.
- 2) Adjustments for unauthorized were made using a model created by SHADAC from the Survey of Income and Program Participation and the ACS (Fried 2014) and an employer offer estimate from the literature (Cunningham 2010).
- 3) Data on enrollment are based on administrative data provided by the Maryland Health Benefit Exchange on May 21, 2018. Data reflects both APTC enrollment, as well as those enrolled who are not receiving a subsidy.

Notes:

1) Potentially eligible are defined as either nonelderly adults above 138% of poverty who were uninsured or had non-group coverage or children above 322% of the poverty level who were uninsured or had non-group coverage. Adjustments to this population (exclusion of unauthorized immigrants and those with an employer offer) were done using a model created by SHADAC (HSR 2014) and an employer offer adjustment estimate from the literature.

2) For details on the methodology, see memo to the Maryland Health Benefit Exchange dated April 1, 2016 titled "Geographic Distribution of Individuals Remaining Eligible for Coverage through the Maryland Health Benefit Exchange – Adjusted."
